Giulia Valle, composer, arranger, and bass player, is one of the most prolific, original, and international voices in Barcelona's jazz scene. She has always combined her particular richness of ideas, composing her own universe of sound, uniquely diverse and distinct, with an extraordinary ability to put "together and lead creative teams, devoted to her music, which she systematically arranges and rearranges until her tracks are pushed to the front of everything.

GIULIA VALLE TRIO

With “Live in San Francisco,” the composer’s seventh album, Giulia dives into the concept and soundscape of the trio, performing vibrant concerts in which the common denominator is the extensive interaction between the three instrumentalists and Valle’s always-captivating music. On this occasion, Giulia introduces two young musicians who are very promising as well as skilled and extremely creative, Tom Amat and Adrià Claramunt. This is a new chapter that unites a new development in Giulia’s always-intense and rich music with the discovery of young musicians worthy of the national jazz scene.

Here's an excellent example of a quintet speaking as one voice.

Farrel Lowe | ALL ABOUT JAZZ USA

The album "Live in San Francisco" reflects his creator: powerful, sensitive and beautiful.

Michel Arcens | NOTES DE JAZZ France

Giulia Valle's 'Libera' is a project that transcends all stylistic corsets and is able to bring you in only one track, the folk cadence of marching band, a fanfare, a mariachi, and then it can fly free over the premises of a psychedelic flashed free-jazz sound. Great music.

Ramon Surio | LA VANGUARDIA Barcelona

Nowadays, European Jazz scene will have to count on Giulia Valle's talent.

Jacques Denis | JAZZ MAGAZINE France

As time goes by, Giulia has become an artist that goes far beyond her role of jazzwoman and is has established herself as a composer that ignores any stylistic boundaries.

Esteban Linés | LA VANGUARDIA Barcelona

An extraordinary work that mixes emotions in a very colourful way... this band and his musicians trajectories should be followed very carefully
