## SUMRRA. 7 VISIONS

[CLERMONT MUSIC 2021]

In this latest album, SUMRRA makes the inspired exercise of taking perspective and rethinking our own existence through music. The three musicians based in Santiago de Compostela look with new eyes at the “Sapiens Sapiens”, the “Inner Space” that lives inside each one of us, or the “Ra”, the first Star, the source of all life. They reflect on our eternal position in the “Universal Periphery,” or the permanent dance of the “Gravitational Forces.” They tell through their music what happened “13.7 billion years later”, or why there are 7 degrees that separate “Aswan from Alexandria”. A result as surprising as it is revealing.
