

rémie panossian trio

RP3 - Rémi Panossian Trio - is, above all, a story of friendship between three rebellious children of French jazz who embarked on their adventure in 2009. These three accomplices, both in life and on stage, love to share their joy of playing together with their audience, shaking up the conventions of the genre with playfulness, melodic lyricism, and catchy grooves. The trio fully embraces its "pop" side, light but always exigent.

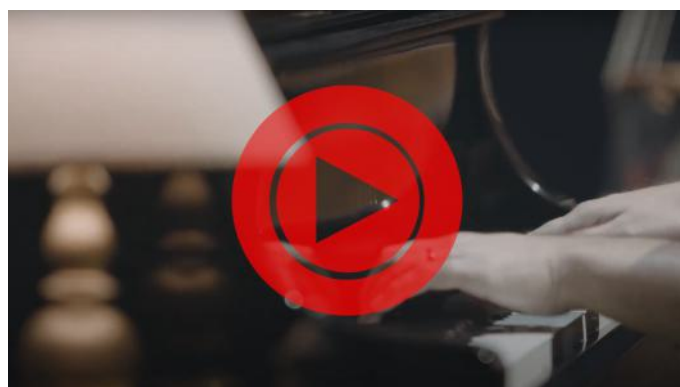

Three years after the release of the acclaimed Sun Monkey Voltage and some jaw-dropping international tours, the most pop and coolest trio in French jazz is back in grand style to celebrate their 15 years of existence with a new studio album entitled 88888888. Symbolizing infinity and considered the best number according to Feng Shui, the number 8 is a true lucky charm, synonymous with longevity and prosperity. A nod, then, to this eighth record, which is as brilliant and polished as it is relaxed and jubilant, and which might finally be the one to win recognition in RP3's home country, and, for sure, to abundance, generosity, and good vibes.
