

OREKA^{TX}

Oreka TX is a pioneering band that has taken the txalaparta, a traditional Basque instrument, to new sonic horizons. Founded by Harkaitz Martínez de San Vicente and Mikel Ugarte, the group has created a unique musical language that blends the ancestral roots of the txalaparta with contemporary sounds and influences from diverse cultures. On stage, Oreka TX transforms the txalaparta into a universal instrument, delivering a vibrant experience where rhythm, innovation, and emotion converge. Their music transcends borders and forges a deep connection with audiences through the raw power of shared sound.

The band was created in 1997 and since then they have not stopped exploring and spreading the possibilities offered by this instrument, experimenting both with its musicality and construction materials (from the original wood to stone, tiles, bamboo... even ice!), enjoying and letting others enjoy this wonderful instrument.

They have presented their work in all five continents, conquering public and specialised critics, thanks to the instrument's appearance and the band's energy.

THE TXALAPARTA AS A BRIDGE BETWEEN ROOTS AND HORIZONS.

In addition to musical fusion, they also enjoy experimenting and creating shows with other artistic disciplines, such as dance, circus, audiovisuals, rural sports or other elements that inspire them to come up with imaginative universes.

Above all collaborations, awards or recognitions, for Oreka TX the greatest pleasure is to share its passion for the txalaparta and the universe of Basque culture with the world.
